

Brand & color

Court Blue carries action and selection. Volt marks what is open or confirmed. Everything else stays calm so status reads instantly.

Status system

Every status is an icon + a word + a color family. The server owns every status change; the app only displays what it receives.

Booking status

BADGE	API VALUE	MEANING · WHAT HAPPENS NEXT
 TEMPORARY HOLD	TEMPORARY	Slot held for 10:00 while the player pays. No proof yet. → proof uploaded, or it expires.
 PAYMENT VERIFICATION	PAYMENT_SUBMITTED	Proof submitted, waiting for staff. The 10-minute timer no longer applies. → approved or rejected.
 CONFIRMED	CONFIRMED	Staff verified the payment and approved the booking. → completed after play, or cancelled.
 PROOF REJECTED	REJECTED	Staff rejected the proof and gave a reason. → new proof inside the resubmission window, or it expires.
 EXPIRED	EXPIRED	No proof within the payment window. The slot is released to everyone.
 CANCELLED	CANCELLED	Cancelled by the player or by staff. Slot released.
 COMPLETED	COMPLETED	The booked time has passed. Shown under Past.

Feedback & overlays

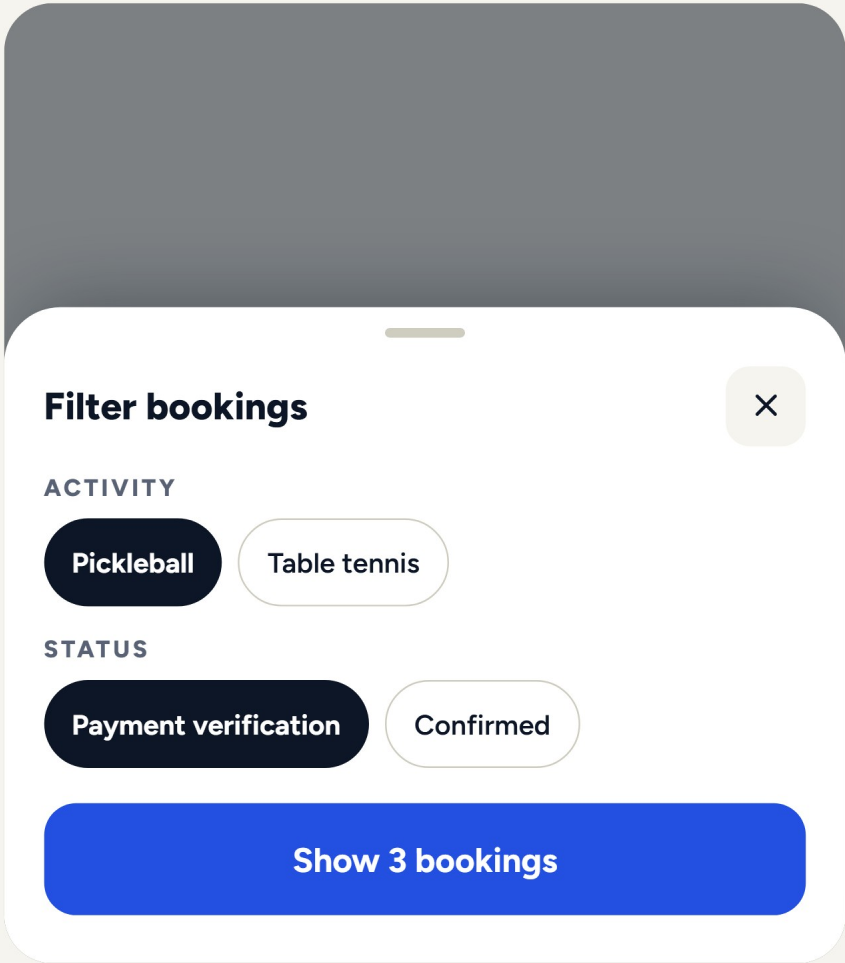

Nobody is ever left on a blank screen: every empty, loading and error state explains what happened and offers the next step.

CONFIRMATION DIALOG

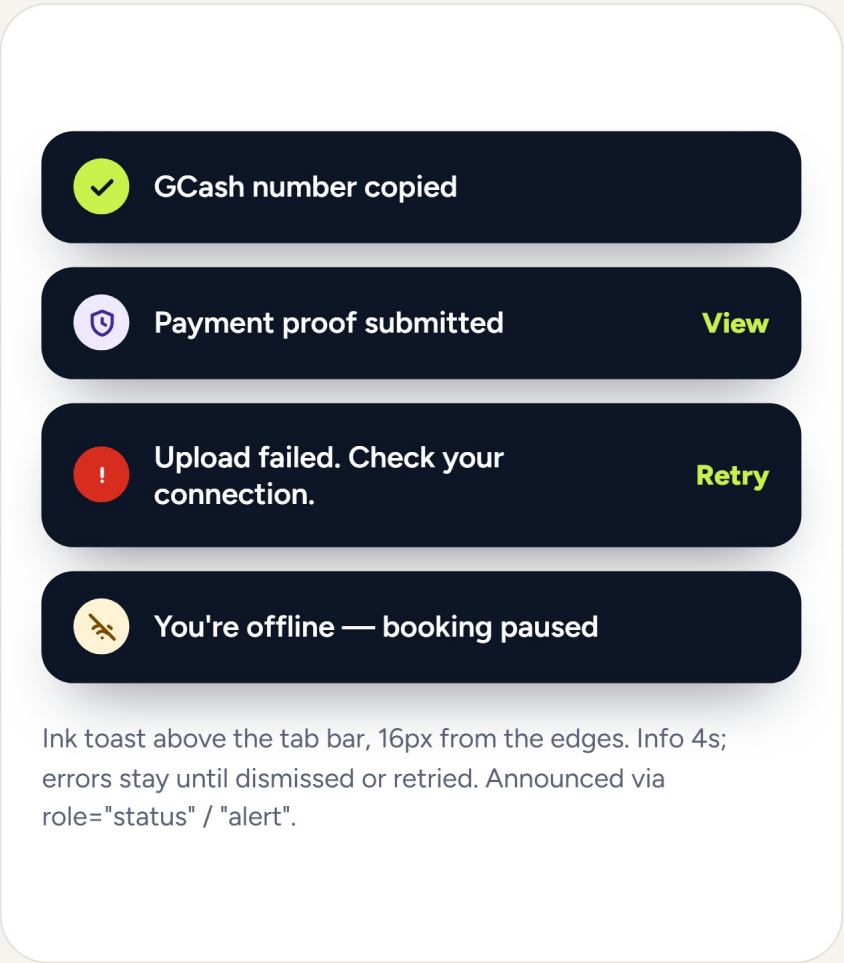

Radius 24 · focus trapped · Esc / scrim closes (except while submitting). Destructive action states its consequence.

BOTTOM SHEET

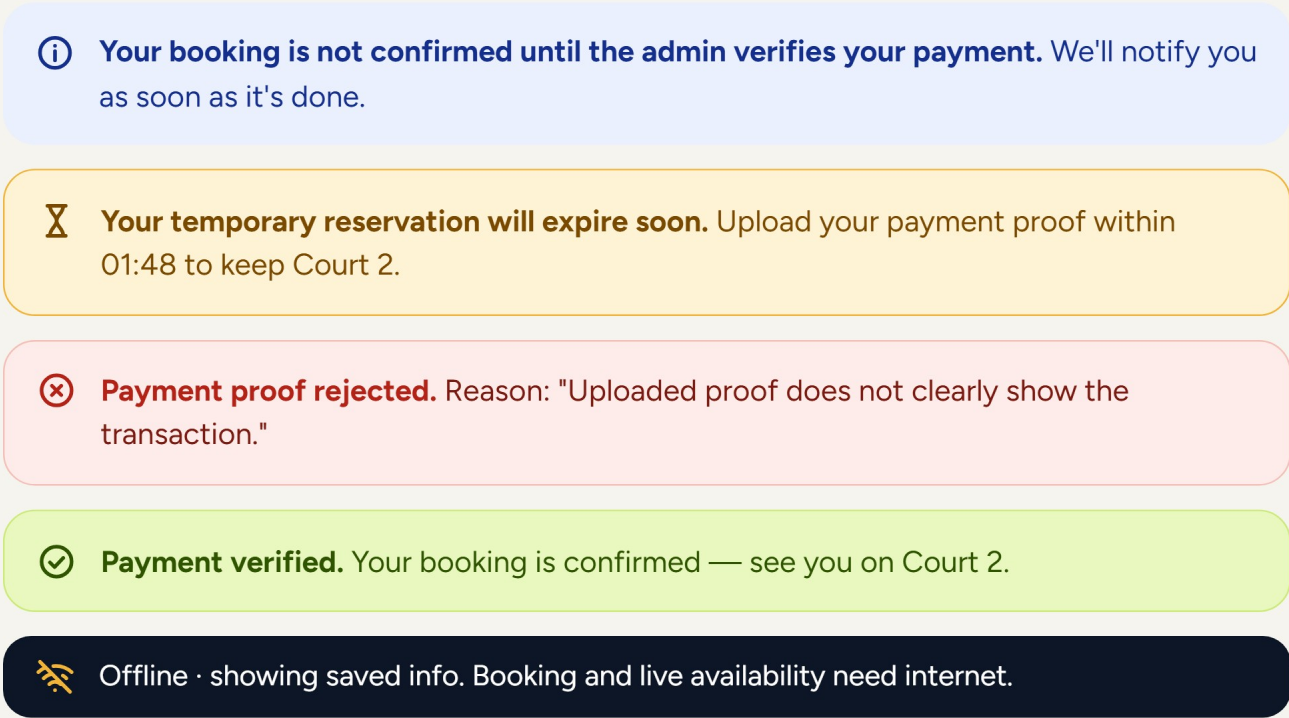

Top radius 28 · grab handle · swipe down or X to close · primary action pinned above the safe area.

TOASTS

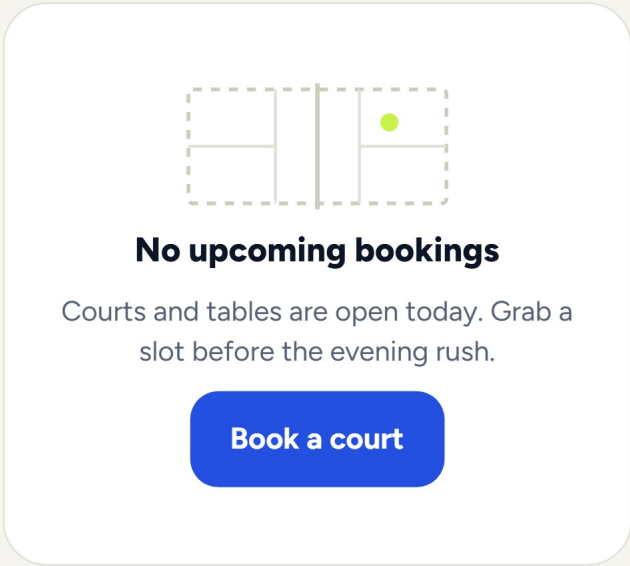

Ink toast above the tab bar, 16px from the edges. Info 4s; errors stay until dismissed or retried. Announced via role="status" / "alert".

SAFE AREAS

Top inset is left empty — no painted status bar. Header padding: `env(safe-area-inset-top) + 12px`

Bottom inset sits under the tab bar and sticky CTAs: `padding-bottom: max(16px, env(safe-area-inset-bottom))`

viewport-fit=cover in the meta viewport; landscape adds left/right insets.

MOTION

Press	90ms	scale .97, ease-out
Hover	160ms	lift -2px + raised shadow (pointer devices only)
Select slot	180ms	fill to blue, check pops 0.6 → 1
Page	240ms	forward: slide 24px + fade; back reverses
Sheet	280ms	rise from bottom · cubic-bezier(.32,.72,0,1)
Success	600ms	ring scales in, check draws once — no confetti
Countdown	1s	ring ticks linearly; turns amber at 2:00, never flashes
Reduced	—	prefers-reduced-motion: fades only, no slides or pops

Success moment: outer ring 0 → 1 (240ms), inner volt disc, check stroke-dashoffset draw (360ms).
